02 MOVING FORWARD

KHAZANAH
NASIONAL

2024 global macro and market landscape will be challenging on the back of heightened political uncertainties, requiring astute active investment management to navigate the dynamic market landscape

2024 Global

Weaker global growth & trade due to tight monetary policy and fiscal tailwinds fading

Dampened growth in China due to deflationary and deleveraging feedback loop

Elevated political and geopolitical uncertainty due to elections in over 60% of the global GDP

Global disinflation on the back of softer demand and services prices moderating

2024 Malaysia

Modest domestic growth underpinned by a weak China and soft domestic investments

Fiscal discipline and Government debt position

Potential implementation of **fiscal reforms**

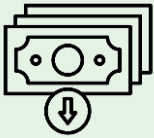

Investments to be driven by FDIs on the back of global supply chain relocation from China

KHAZANAH NASIONAL

For Malaysia to achieve a 4 – 5% GDP growth in 2024, corporate investments need to proactively drive growth to mitigate subdued domestic consumption, fiscal discipline requirements and weak external demand

	Consumption	Investments	Government	Net exports
GDP growth drivers	 <p>Dampened domestic consumption on moderate household spending</p>	 <p>GLCs investments and DDIs to support economic growth and jobs creation</p>	 <p>Need for fiscal discipline</p>	 <p>Weak external demand dragged by China</p>
Challenges	 <p>Relatively high household debt & low savings</p>	 <ul style="list-style-type: none"> ▪ DDIs lag FDIs in increasing economic complexity ▪ Falling private investments 	 <ul style="list-style-type: none"> ▪ Implementation of fiscal reforms ▪ Subsidy retargeting 	 <ul style="list-style-type: none"> ▪ Weaker global growth due to tight monetary policy ▪ Trade partners' weak demand
